

How Did Carol Earn 24 Credits and Save \$8,900 Toward Her Degree?

She Completed Our Online Portfolio Development Course

Carol began her college education in 1975, but became sidetracked when she had the opportunity to advance in the field of real estate development management. Instead of earning a degree, she decided to pursue industry certifications and training.

However, in 2008, with the real estate market in steep decline, Carol's business all but dried up. Even though she had more than 20 years of business experience, she faced a job market that now required a bachelor's degree simply to qualify for an interview.

When she learned about Kaplan University's portfolio development and assessment course, Carol seized the moment. Working closely with her Advisor, she was able to fast-track the completion of her Bachelor of Science in Business Administration/ Human Resources.

After submitting her portfolio for assessment, Carol earned 24 credits, saving her more than \$8,900 in tuition and 2 terms toward her degree.*

* Tuition savings calculated as 24 x \$371.00=\$8,904.00. As of January 2013, students who completed EL 203, on average, earned 26 quarter credits. Number is based on the total number of students who have passed EL 203 and submitted a portfolio for evaluation. Figures are provided for illustrative purposes and are not a guarantee that students will earn any particular number of credits or achieve any particular savings. No experiential learning credits are guaranteed through this process. Graduate students are not eligible to submit experiential learning portfolios.

This testimonial was solicited by Kaplan University. The views and opinions expressed are those of the individual; student experiences may vary.

“As someone in business for over 25 years, the ability to ‘fast-forward’ my degree was as important as the cost savings.”

– Carol Platt
