

Kaplan University Campuses – Placement Rates

Kaplan University calculates job placement rates for its ground campuses to ensure that its students are succeeding beyond graduation. Kaplan University campuses are located in Cedar Falls, Cedar Rapids, Council Bluffs, Davenport, Des Moines, Mason City, Lewiston, South Portland, Frederick, Hagerstown, Lincoln, and Omaha. Job placement rates for some, but not all, programs may also be calculated for accreditation and state regulatory purposes.

Kaplan University Online does not calculate placement rates.

The Medical Assisting Education Review Board, the Commission on Accreditation for Health Informatics and Health Information Management Education and the Nebraska Coordinating Commission for Postsecondary Education require Kaplan University to calculate job placement rates. These rates are calculated according to a specific and time-limited period as prescribed by each respective state regulator or accreditor(s). Formulas differ between states, and between accreditors. As such, the rates below reflect only the proportion of graduates who were placed within the applicable prescribed time period, and do not include graduates placed outside of that specific timeframe.

Kaplan University Cedar Falls

Notes							
1	The Medical Assistant Program is accredited by the Commission on Accreditation of Allied Health Educational Programs upon the recommendation of the Medical Assisting Education Review Board. This accretor requires the calculation of employment placement rates. The rate is calculated as the percentage of graduates from the year ending 12/31/09 who were employed in a related field, continuing education, or serving in the military as of November 24th in the year following their graduation. The established placement threshold for this accretor is 70%.						
2	Kaplan University calculates internal employment placement rates to ensure that its students are succeeding beyond graduation. Those rates are calculated as the number of students who graduated between 7/1/09 and 6/30/10 and were placed by 12/31/10 divided by the total number of students who graduated between 7/1/09 and 6/30/10 and were available for placement. Graduates available for placement are those graduates who do not have a placement waiver or are not otherwise unavailable for placement for reasons including health related issues, pregnancy, continuing education and military service.						
3	The Health Information Technology Program is accredited by the Commission on Accreditation for Health Informatics and Health Information Management Education, which requires the calculation of employment placement rates. The rates are calculated as the percentage of students who graduated between 8/1/07 and 7/31/10 and were placed in employment or are continuing their education as of June 1 of the following year. The established placement threshold for this accretor is 80%.						
4	The State of Nebraska requires Kaplan University to calculate job placement rates for its degree programs. Those rates are calculated as the number of degree-program graduates from between 4/1/08 and 3/31/09 who were placed by 5/31/09 divided by the number of students who graduated from degree programs during the reporting period of 4/1/08 - 3/31/09 who were available for placement. Graduates are unavailable for placement if they are continuing their education or serving in the military.
