Make a Healthy Difference in a Growing Industry.

The Bureau of Labor Statistics predicts that employment of health care occupations could increase by 19% between 2014 and 2024, resulting in an estimated 2.3 million new jobs, many of which are in fields related to Kaplan University programs.² As the population grows older and health care reform increases the number of individuals who have access to health insurance, the demand for health care professionals is also expected to grow.²

Whether you are looking to pursue a new career or make a career change, Kaplan University's health science program could help.

Make a Healthy Career Choice By Pursuing Your Degree.

The Bachelor of Science in Health Science is designed to prepare graduates to pursue a variety of career opportunities in health care- and health science-related industries.¹ Through the development of administrative, ethical, and professional skills, you could prepare to pursue leadership positions in health care. An original, comprehensive capstone project gives you the opportunity to apply your health science knowledge and skills to real-world scenarios.

Possible Career Opportunities:

- › Health services manager
- › Patient coordinator
- › Occupational health specialist
- › Health officer
- › Public health program manager
- › Health advocate

Potential Day-to-Day Activities:

- › Supervise and evaluate work activities of medical and technical personnel, nurses, and clerical staff
- › Coordinate and implement services in health care or medical facilities
- › Complete case histories by interviewing patients and contacting appropriate authorities
- › Recommend and implement measures that can protect workers from potentially dangerous work environments
- › Conduct safety and education programs

Customize Your Degree to Prepare for the Career You Want.

Kaplan University's **Bachelor of Science in Health Science** program is designed to provide you with knowledge and skills in the broad areas of health science and health care. You will have the opportunity to apply principles of healthy living to the education of individuals and communities. Plus, you could develop administrative, ethical, and professional skills that could enable you to pursue leadership positions in the increasingly diverse health care field.¹

You can choose to further customize your degree by focusing electives on a particular area of study, such as nutrition or health science.

You can also choose to complete an **accelerated master's degree option**, which allows you to work toward your bachelor's degree while simultaneously completing up to five core courses in a School of Health Sciences master's degree program. Choose from master's degrees in health care administration, health informatics, health information management, public health, and health education. If you successfully complete these courses with a minimum course

grade, and have applied and been accepted to the applicable Kaplan University master's degree program, you will enter a shortened version of the master's degree program.

Kaplan University's program curriculum emphasizes:

- › Gaining an understanding of demography, epidemiology, biostatistics, and other tools used to assess community health
- › Understanding and applying the concepts of health, healing, and wellness from a broad historical and multicultural perspective
- › Employing the professional, ethical, and legal standards of health care practice and interdisciplinary collaboration through leadership and community stewardship
- › Demonstrating competency in medical research and inquiry using scientific methods and laboratory skills for critical thinking and problem solving in health care settings

Program Detail

Bachelor of Science in Health Science

› **Credit Hours:** 180

Accelerated Master's Degree Option

› **Credit Hours:** 180 for the Bachelor of Science in Health Science; if 5 courses completed as part of the undergraduate program, minimum of 28-36 depending on graduate program selected

Here Is What One Faculty Member Had to Say

Ann Dickerson, MPH

› School of Health Sciences Adjunct Faculty

“There is little in life that is held more precious than the life, health, safety, and wellness of individuals and communities. Through this program, we prepare students with critical knowledge and technical abilities to pursue careers that positively impact the health of individuals and communities.”
