

Information Technology Postbaccalaureate and Graduate Certificates

Technology Moves Fast—Make Sure Your Career Keeps Pace.

Information technology is an innovative field that has transformed virtually everything about the way the world works. This is expected to translate into a growing long-term need for talented IT professionals in a variety of fields.¹ A degree in information technology from Kaplan University could help you pursue a career in this evolving industry.

We offer several certificate programs designed to help postbaccalaureate students develop the critical knowledge and skills to advance in their fields.²

The Future of Technology Could Offer Promising Opportunities.

As technology evolves, the demand for tech-savvy individuals is expected to increase as well. Employment in computer occupations is expected to grow 13.1 percent through 2024, which is faster than the average of all occupations.¹ To keep up with the increasingly complex advances in technology, employers may require a higher level of skill and expertise from employees. A certificate in IT from Kaplan University could provide an edge for those with bachelor's degrees looking to take advantage of the growth in this field.²

Diverse Certificate Offerings to Serve a Diverse IT Field.

Cisco Networks Postbaccalaureate Certificate

- Designed to provide foundational knowledge of network administration, TCP/IP protocols, and network routers and switches
- Students configure and troubleshoot network routers and switches using live and simulated labs

Computer Forensics Postbaccalaureate Certificate

- Designed to provide foundational knowledge of intrusion detection systems, incidence response strategies, computer forensics, and forensic techniques
- Students explore computer forensic software

Graduate Certificate in Information Security

- Designed to provide foundational knowledge of network security tools, computer security, penetration testing, ethical hacking, and cryptography
- Students explore various types of software such as network security tools, hacking tools, and cryptographic tools
- Students pursuing this certificate must hold a bachelor's degree in information technology

Information Security Postbaccalaureate Certificate

- Designed to provide foundational knowledge of network operating systems, network security, threat detection and response methods, disaster recovery planning, cryptography, and information security and risk management

Microsoft Operating Systems Postbaccalaureate Certificate

- Designed to provide foundational knowledge of PC configuration and maintenance, desktop administration, network administration, and Active Directory configuration
- Students explore Microsoft operating systems

Programming and Software Development Postbaccalaureate Certificate

- Designed to provide foundational knowledge of software development, advanced programming, and advanced database concepts; and advanced software development and design strategies
- Students explore various types of programming languages

Note: certificate programs may not be available in all states. Contact an Admissions Advisor for more information.

Real-World Knowledge to Help You Pursue Real-World Success.

Kaplan University's certificate programs are designed to help students stand out in the IT field as well as prepare for specific professional certifications.

Certificate ³	Potential Career Outcome ²	Exams and Certifications ⁴
Cisco Networks Postbaccalaureate Certificate	Entry-level positions working with Cisco networks	Helps students prepare for the Cisco Certified Network Associate (CCNA) certification exam
Computer Forensics Postbaccalaureate Certificate	Entry-level positions in computer forensics	Helps students prepare for the CompTIA Network+, CompTIA Security+, and the EnCase Certified Examiner (EnCE) certification exams
Graduate Certificate in Information Security	Advanced positions in information security	Helps students prepare for the Certified Ethical Hacking certification exam
Information Security Postbaccalaureate Certificate	Entry-level positions in information security	Helps students prepare for the CompTIA Network+, CompTIA Security+, and Certified Information Systems Security Professional (CISSP) certification exams
Microsoft Operating Systems Postbaccalaureate Certificate	Entry-level positions working with Microsoft operating systems	Helps students prepare for various Microsoft certification exams
Programming and Software Development Postbaccalaureate Certificate	Entry-level positions in the field of programming and software development	Helps students prepare for the CIW Associate Design Specialist certification exam

Kaplan University— A Different School of Thought®

Why Kaplan University?

Our programs are designed to offer you the freedom to grow and pursue your goals. We offer:

- Online classes that allow you to study virtually anytime, anywhere you have an Internet connection.
- Personal advisors to help you select the courses to meet your goals.
- Reduced tuition rates for servicemembers, including Guard and Reserve, and veterans.

Other Programs

In addition to these certificates, Kaplan University also offers:

- Master of Science in Information Technology
- Master of Business Administration
- Master of Science in Management and Leadership
- Bachelor of Science in Information Technology

Note From the Dean

“Technology is changing the way we learn, communicate, work, and live. I hope you will join us on this incredible journey and prepare to stay ahead of the curve. Our degree programs and courses help you gain the knowledge to become skilled at using this technology to benefit society and yourself. I look forward to welcoming you to our community.”

Thomas Boyd, Dean and Vice President
School of Business and
Information Technology
