

Master of Health Information Management

School of Health Sciences

Advance Your Career in Health Information Management.

Health information management (HIM) is a diverse, rapidly evolving field with varied opportunities for qualified professionals. The Master of Health Information Management can help prepare you with the knowledge and skills to pursue leadership positions in health information management, administration, education, and research.¹

Kaplan University's online Master of Health Information Management is focused on the strategic and operational relevance and robustness of clinical information, resources, workflow, and connectivity within the health care industry and public health sectors.

We also offer the Bachelor of Science in Health Information Management which could provide a foundation for graduate study in the Master of Health Information Management and Master of Health Informatics programs.

Opportunities in Health Information Management Are on the Rise

Graduates of Kaplan University's Master of Health Information Management can use their academic preparation in business, health care, and information management in a variety of exciting positions. The Bureau of Labor Statistics anticipates national long-term job growth for health information management professionals. Employment of medical and health services managers, a category that includes health information managers, is expected to increase by 17 percent through 2024, faster than the average for all occupations.²

Kaplan University's Master of Health Information Management can prepare you to pursue these opportunities and achieve your professional goals. Our practical, career-focused program is designed to equip you with the knowledge and skills you need to launch your health information management career and become a qualified job candidate employers are looking for.

Students who have successfully completed the program can seek employment in settings including:

- Hospitals
- Health care clinics
- HMO administrative offices
- Long-term care organizations
- Insurance providers

Real-World Education Designed to Prepare You for Success

Kaplan University's interdisciplinary Master of Health Information Management program focuses on design, selection, implementation, and support and maintenance of global health information systems. Coursework will cover areas including organizational development and management for health information, human resources for health care managers, health care financial management, and leadership in health care. And, you will be taught by instructors with industry experience who are committed to your academic and career success.

Kaplan University's Master of Health Information Management Curriculum Emphasizes the Following:

- Designing effective strategies based on concepts of leadership and health information management in administrative and business environments
- Analyzing the impact of economics, ethics, professional standards, and the law on health information
- Evaluating public policy and health care policies and procedures to support the global health information management industry
- Comparing financial data analytics to optimize health information systems

Capstone Project

The Master of Health Information Management program culminates in the successful completion of a practice-focused capstone project. This project provides you with opportunities to apply what you've learned throughout the program to a challenging, real-world health information management problem or issue. You will conduct the capstone project under the mentorship of a faculty advisor.

Master of Health Information Management

Credit Hours: 48

Here Is What One Instructor Had to Say

Brina Hollis

› Kaplan University Health Information Faculty

“Opportunities in health informatics professions are endless. The Master of Health Information Management program at Kaplan University provides practice and knowledge in the skill of communication and provides the understanding of the impact of federal policy on the health system and health informatics profession. The Kaplan University program promotes data governance, data stewardship and the financial, technological, clinical facets of the MHI profession.”
