Notes: *Employment rates calculated by academic year

Source: Kaplan University Provost Office, March 2016

¹The Total Student Count is the count of all matriculated students who matured to 150% time during the academic year stated. The graduate count is the count of students within that group that graduated within the 150% threshold.

² Retention Rates were calculated summing all students who attended both in a given calendar year and the previous year, and divided by the total students who attended the previous year.

³ Employment data is from Career Services and reflects the outcomes of graduates from our programs in 7 states. Reported employment rates should not be inferred as an overall outcome of the university. We will be able to report outcomes from all of our graduates starting with the 2015-2016 graduate cohort which will close at the end of December, 2016.
