Now May Be the Right Time to Move Your Career in Health Care Forward.

As the structure of the health care industry evolves, health care managers and administrators face the challenge of improving the efficiency and quality of care while controlling costs.² A master's degree in health care administration could help you develop the skills to pursue a new health care management position or advance in your current one.¹

According to the Bureau of Labor Statistics, national long-term job growth for medical and health services managers is expected to be 17 percent from 2014 through 2024, which is much faster than the average for all occupations.²

Pursue a Master of Health Care Administration from Kaplan University and prepare to make the most of your talent and these industry trends.

A Master's Degree Could Help You Get Ahead.

Are you interested in pursuing a leadership career in health administration within local, state, and federal government, or in private industry? The **Master of Health Care Administration** program is designed to emphasize advanced knowledge and skills as well as overall concepts, values, research methods, and applications relevant to the field.

Career outcomes for graduates of this program could include, but are not limited to, health services administrator, health care manager, clinical manager, hospital administrator, health services project administrator, department director, or managed care manager.

Advancement opportunities could be greater for job seekers who hold a master's degree.² Prepare to increase your marketability by earning your Master of Health Care Administration today.

Possible Career Opportunities and Day-to-Day Activities:¹

- › **Health Services Manager**—Plan, direct, coordinate, and supervise the delivery of health care. Oversee the activities of a number of facilities in health systems. Help formulate business strategies and coordinate day-to-day business in a health care facility.
- › **Clinical Manager**—Establish and implement policies, objectives, and procedures for departments. Evaluate personnel and work quality. Develop reports and budgets, and coordinate activities with other managers.
- › **Hospital Administrator**—Ensure the health care facility operates efficiently and provides adequate care to patients. Provide on-call support when problems arise, handle budget and staffing matters, create organizational objectives, and implement policies.

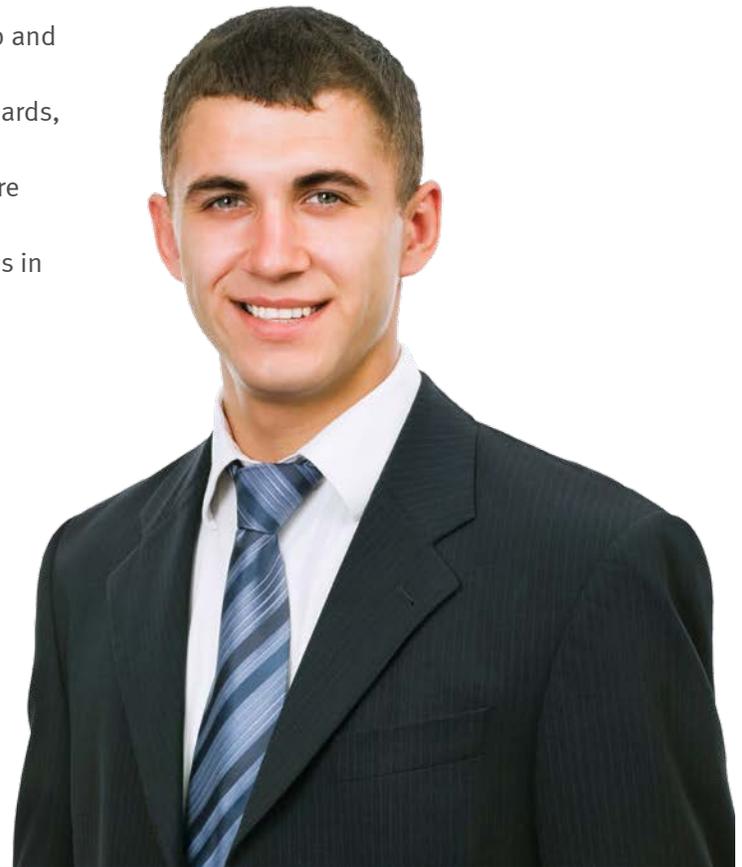

Note: additional education, certification, or licensing may be required for certain positions.

Real-World Knowledge to Help You Pursue Real-World Success.

Students enrolled in Kaplan University's Master of Health Care Administration program have the opportunity to develop knowledge in advanced health care administration topics from a comprehensive curriculum taught by acknowledged practitioners. Students who already hold leadership positions may use this degree to refine, apply, and improve managerial and leadership skills.

The Master of Health Care Administration's curriculum emphasizes:

- › Analyzing, integrating, and evaluating theoretical knowledge relevant to leadership positions in the health care industry
- › Designing effective strategies based on concepts of leadership and management within health care administration
- › Assessing the impact of economics, ethics, professional standards, and the law on health care administration
- › Developing health policies and programs to address health care needs in the industry
- › Applying complex theories and developing innovative solutions in order to become a health care leader
- › Applying statistical and financial methods in order to evaluate health care practices
