Master of Science in Information Technology

Technology Moves Fast—
Make Sure Your Career Keeps Pace.

Information technology is an innovative field that has transformed virtually everything about the way the world works—and is expected to continue to do so. This translates into an anticipated long-term demand for talented, highly educated IT professionals in business sectors, government agencies, institutions, and various industries.[1]

At Kaplan University, our Master of Science in Information Technology program is designed to help you develop the technical, managerial, and creative skills that could help you advance in the IT field.[2]

KAPLAN UNIVERSITY

The Future of Technology Can Offer Promising Opportunities.

As technology evolves, the demand for tech-savvy individuals is expected to increase as well. Employment in computer and information technology occupations is expected to grow 12% between 2014 and 2024, which is faster than the average of all occupations.[1]

To keep up with the increasingly complex advances in technology, employers may require a higher level of skills and expertise from employees. A master's degree in IT from Kaplan University could help those looking to take advantage of the expected growth in this field.

A Versatile Degree Could Lead to Versatile Career Opportunities.

With a Master of Science in Information Technology, you could apply your skills to a broad spectrum of occupational environments.[2] Graduates may find careers in many industries that feature computer networks, including government agencies, law enforcement, and health care.

Characteristics that are relevant to a career in information technology include:

- Critical thinking
- Business aptitude
- Collaboration skills
- Communication abilities

Technology Is Changing Lives.
With the Right Degree, It Could Change Yours.

The objective of the **Master of Science in Information Technology** program is to challenge students to blend technical knowledge of information solutions with creative management concepts. You will study how to match business requirements with technology solutions, as well as project management and emerging technologies. You could develop skills in the areas of decision-making, analysis, collaboration, and communications.

Kaplan University's curriculum emphasizes the following:

- **Information Technology Leadership:** Lead teams and organizations in managing information systems and their business outcomes.

- **Systems Analysis and Design:** Develop efficient, effective, and secure systems solutions.

- **Information System Security:** Secure an organization's digital assets and intellectual property.

- **Project Management:** Manage scope, schedule, and resources to deliver quality information systems projects.

- **Ethical Practices:** Evaluate information systems' legal, ethical, social, and global implications to ground decisions and optimize social outcomes.

- **Decision Analysis:** Create business intelligence for use in evidence-based decision making.

Program Detail

Credit Hours: 60

Concentrations:
› Business Intelligence and Analytics
› Information Security and Assurance
› Project Management

Kaplan University—
A Different School of Thought®
